PROJECTS

React Boilerplate — *Code*
React, Node
- This project was made to experiment with core React and deep dive into the complexities that CRA handles for you behind the hood. It creates a working boilerplate directory for you with one simple command.

Sorting Visualizer — *Code* | *Live*
HTML/CSS, Vanilla Javascript
- Uses DOM manipulation, together with JS Promises to visualize sorting algorithms on unsorted vertical bars.

EXPERIENCE

EnerKnol, Brooklyn, NY — *Software Developer*
JUN 2020 - SEPT 2020
- Worked with client-facing software to develop and test features to meet the needs of consumers and clients.
- Enhanced existing features and solved client-facing problems.

Opportunities for a Better Tomorrow, Brooklyn, NY — *Internship Project Associate*
MAY 2017 - SEPT 2017
- Managed 3 teams of 5-7 members to develop a web application for small businesses.
- Determined and defined each project's objectives
- Measured project performance regularly to identify areas of improvement

EDUCATION

CUNY - Brooklyn College, Brooklyn, NY — *B.S. Computer and Information Science*
Spring 2021
- Minor in Multimedia Computing
